OutCalled

Going Out Is Our Religion

Agent onboarding and field guide

1. Receive your invitation

Eddy invites you by your exact email. Open your private invitation, sign in, verify that email, and accept before expiry. Invitation acceptance is separate from your agent agreement and compensation terms.

2. Open your approved personal card

Only an active approved agent can generate a personal card. Select Business Owner from your attributed card. Generic website QRs do not identify an agent.

3. Introduce OutCalled

Ask the owner or manager whether this is a good time. Ask how they promote events, then show one relevant benefit: event information, supported invitations, or business tools. Never guarantee sales, attendance or placement.

4. Save the business referral

The owner scans your personal Business Owner QR, signs into their verified account and chooses Save my business referral. Wait for confirmation. Scanning alone does not save attribution. The same account must be used for an eligible business subscription.

5. Explain sales and commission

Business subscriptions only are included in current sales attribution. A saved referral is not a sale. Purchases require backend verification and administrator review. Commission payment is separate, not automatic; confirm written terms with Eddy.

6. Follow up and get help

Ask permission before saving contact details or following up. Never request passwords or payment details. Read the separate online guides for invitation, referral and sales steps. Existing app screens may retain an earlier name during the public rebrand.
